SKILLS

3D & XR: Unity, Unreal Engine, Three.js, WebGL, Blender, Maya, 3ds Max, WebXR, ARKit, ARCore, glTF

AI & ML: LLM, RAG, AI Agents, Prompt Engineering, MediaPipe, embeddings, vector databases

Digital Twins: IoT architecture, MQTT, OPC-UA, BACnet, Modbus, DTDL, real-time synchronization

Programming: Java, C, C++, C#, Python, JavaScript, TypeScript, Node.js, PHP, SQL

Frameworks: React, Vue.js, Express, Django, Laravel, Spring Boot, Flutter

DevOps & Cloud: Git, Docker, Kubernetes, CI/CD, Linux, Node-RED

Databases: MongoDB, PostgreSQL, MySQL, Redis, InfluxDB

LANGUAGES

Arabic Native

French Conversational

English Proficient

INTERESTS

Video Games - Music - Football -
Hiking - Sport - Travel

CERTIFICATIONS

Advanced XR Developer (IDC x EON XR)

Software Engineering – Design & Project Management (Coursera)

React – Web Development (Coursera)

Java & Object-Oriented Programming (Coursera)

Containers: Docker, Kubernetes & OpenShift (Coursera)

YASSIR AITALI

Software Engineer – AI, Full-Stack & DevOps

Software engineer strong in full-stack development, DevOps, and AI engineering (LLMs, RAG, agents), with a differentiating edge in real-time 3D and digital twins. I work end to end – from architecture to deployment (Docker, CI/CD, cloud) – with a focus on clean, production-ready systems. Autonomous, rigorous, and problem-solving by nature, I collaborate easily in a team and communicate clearly across technical and business sides.

Education

Engineering Degree – MIAGE

Moroccan School of Engineering Sciences (EMSI)

Specialization: DevOps, AI, Big Data, Software Architecture, Cloud.

October 2023 – Present

Marrakech

VR Developer Diploma

IDC & VR Innovation Academy, UM6P

Specialization: VR/AR, Immersive 3D Environments, 3D Modeling, 3D Animation, Unity, Blender, WebGL, Industry 4.0.

May 2023

Benguerir / Marrakech

Professional Diploma: BTS

BTS Multimedia & Web Design – Mohammed VI

Specialization: Web Development, UX/UI.

July 2022

Marrakech

Professional Experience

PFE Intern – Digital Twin Developer

DICE / UM6P

2026

Benguerir, Morocco

- Design and integration of an industrial digital twin: multi-protocol IoT acquisition, 3D modeling, immersive Unity/WebGL viewer and real-time synchronization.

Intern – 3D / Full-Stack & VR Developer

Almoftah Real Estate

September 2024

Oman, Muscat

- Built VR/WebGL real-estate viewers (Unity, Three.js), exported and optimized 3D models to glTF, integrated them into interactive web platforms, with modular architecture and Cloud deployments.

Intern – Full-Stack / Game Dev & AI Developer

The UM6P Vanguard Center

August 2023

Benguerir, Morocco

- Real-time AI/ML body-tracking pipeline (MediaPipe, Python→Node→Unity), data-stream processing (light Big Data), modular architecture and Cloud integration for interactive visualization.

Academic Projects

AI Assistant / RAG – Document Intelligence

Document-intelligence app: upload documents, ask questions, and get source-grounded answers and summaries via a retrieval (RAG) pipeline over embeddings.

2026

NOTRAFFIC – Traffic Management System

Smart urban traffic management with AI/ML prediction and map-based visualization of traffic flows.

2025

OPTIPARK – Parking Management System

Smart parking optimization with supervision and spatial visualization.

2024

SOUK – Immersive VR Application

Interactive 3D environment of a Moroccan souk (Unity, Oculus, Blender) with assets optimized for real-time rendering.

2023
